

SCHOLARSHIP APPLICATION 2018

(All applications due by June 5th)

This application is for a Need-Based Scholarship. It can be used to repeat a course during the summer session at Math Support Services. In addition to other things, students will be evaluated on the basis of academic need and their dedication to their studies (GPA and awards).

Students may be awarded a full or partial scholarship. They will be notified via email 1 week prior to the beginning of the summer session. Applications are evaluated using a rubric that measures each aspect of the student's responses. Points are awarded for each category. Only complete applications, that are turned in prior to the deadline, will be given consideration in the selection process.

We work with a student loan institution called "Your Tuition Solutions" that works with parents who want private education options for their child. In order to be eligible for a scholarship, families must apply for an extended payment plan and be denied.

Math Support Services does not review the parent's financial status directly. We ask the parent(s) to submit an application for a 0% financing option. It allows you to spread the payments out over 12 months with no interest. This offer cannot be combined with any other discounts. There are no pre-payment penalties and it allows for a more affordable payment, functioning like a credit card. For example, if you take a one semester math course, and the cost is a minimum of \$999, you will pay a deposit of \$0 and spread out the remaining tuition over 12 months—if you qualify for this option, your payments would be \$84 per month. **If you do not qualify, you will be considered for a scholarship.**

Submissions must also include the following:

- Unofficial copy of your current junior high or high school transcripts.
- Your complete Math Support Services summer school application.
- At least one Letter of Recommendation from a math teacher or counselor, specifying the need for the course you are requesting. Your teacher or counselor can email their recommendation to Peggy@mathsupportservices.com. An excellent letter of recommendation can increase your chances of receiving a scholarship!
- You may also submit a cover letter with photograph. (*Optional*)
